Benefit Your Members

Taft-Hartley's most secure, efficient & configurable benefits administration technology

Since 1977, basys has specialized in benefits administration software for the Taft-Hartley community, providing integrated technology solutions that help trust fund offices, national multiemployer plans and third party administrators accurately and efficiently serve millions of members across the US and Canada. Basys software suites, web-based portals, professional consulting services and application hosting deliver cost-effective and reliable health and pension benefits processing, fund office administration, reporting and member service on a platform built for data security, regulatory compliance and a lower total cost of ownership.

There are three core product suites in the basys benefit administration enterprise, with additional modules and integrations to address your specific business needs:

FundOfficeXG, the basys Contributions and Eligibility accounting suite, can simplify even the most complicated tasks, including multiemployer health eligibility, hour bank administration, retiree health benefits, premium billing and COBRA.

HealthClaimsXG, the basys Claims administration suite, supports the management of self-insured, PPO, HMO and Medicare Supplement plans, as well as Dental, Vision and Disability claims, and provides rules-based auto-adjudication that you can configure based on your

organization's needs. The system is fully compliant with HIPAA 5010 and ICD10, and can seamlessly automate processing of EDI 834, 835 and 837 files with all major trading partners.

PensionBenefitsXG can streamline your 401(k), 401(a) and 403(b) plan management, as well as track and process Vacation, Savings, Supplemental Unemployment, Legal Assistance and other benefits plans. Data exports seamlessly to interface with major retirement plans like Fidelity, Prudential and Mass Mutual, so coordinating with key vendors, modeling retirement options and providing members a full picture of their financial options is easier than ever.

Web Portals

EmployerXG

Give employers real-time, 24/7 self-service access to their information with tools to report work activity and make payments when and where they want with EmployerXG from basys.

MemberXG

Real-time benefits information your members can access online anytime, from anywhere, even on their smartphones. Now they can check claims status, pension credits, submit required documents, make benefits elections and more – without calling the fund office.

Security & Compliance

gobasys

High-availability, cloud-based application hosting with state-of-the-art security and redundancy in Taft-Hartley's first independently audited SOC 2 Type II-certified secure cloud. Be confident that mission-critical systems, data, PHI and plan rules are protected by the industry's highest level of system availability, performance, integrity and confidentiality.

Secure Enhanced Audit Logging

SEAL captures the date and time of every change to your system, including a snapshot comparing the original data with the changed data, the name of the operator/system user who made the change, and a reason code where available. You'll be able to track most basys system data fields and view audit trail information so you'll always know who is accessing or changing your data.

Efficiency & Automation

InsightXG

Making sound decisions requires reliable, easily accessible information. The basys analytics and decision-support tool, **InsightXG**, unlocks the power of your data and gives users simple, flexible and fast access to real-time reports via an intuitive, browser-based interactive dashboard.

WriterXG

WriterXG integrates with your basys system, populating letters, statements, forms and more with account-specific data, allowing you to quickly and efficiently create and send personalized documents for a single member or for thousands of participants or employers.

OperationsXG

This powerful basys tool securely handles and automates the setup, initiation and monitoring of HIPAA 5010 transactions, giving you the power to retrieve, load and export these transactions even while no one is in the office. Trading Partner configurations easily accommodate your 834, 835 and 837 file layouts and interface with trading partners' connection options.

eFlowXG

Automate workflow by routing electronic tasks to the right staff, eliminating lost or destroyed paperwork, improving job turnaround times and reducing the administrative stresses and costs of manual processes. Governed by highly configurable rules YOU control, **eFlow** jobs consistently follow your own established best practices.
