

# WriterXG

Create customized letters, forms and invoices from your basys system

## About basys

*Since 1977, basys has specialized in benefits administration software for the Taft-Hartley community, providing integrated technology solutions that help trust fund offices, national multiemployer plans and third party administrators accurately and efficiently serve millions of members across the US and Canada. Basys software suites, web-based portals and hosting services deliver cost-effective and reliable health and pension benefits processing, fund office administration, reporting and member service on a platform built for data security, regulatory compliance and a lower total cost of ownership.*

**K**eeping members, dependents and employers informed and supplied with vital documents is an important priority – and often a legal requirement – for fund offices and TPAs. With **WriterXG**, basys customers can generate, preview, edit and send letters, forms, invoices and other documents to anyone, quickly, consistently and efficiently.

## Documents on demand

**WriterXG** integrates with your basys system, populating letters, statements and forms with account-specific data so you can quickly and efficiently create personalized documents for a single member or for thousands of participants or employers. Tailor your documents for different communications needs by adding comments, images, notes or other information specific to the situation.

## A library of common templates

**WriterXG** comes with a library of best practice templates for many common fund office forms and letters, such as COBRA offering, pre-determination letter, pend and delinquency letters. You can easily customize them with your logo, contact info and formatting so that recipients

instantly recognize that the documents they're receiving are from your fund office – an organization they know and trust.

You can use the basys-provided starter templates to customize your own forms, letters, invoices or statements. Design your preferred layout, add text, then choose which data fields you want from the member, dependent or employer data elements that are provided with **WriterXG**.

Preview changes and edit your document, giving you control over the final output, and save custom templates to your library to use again when you need them.

## Flexible delivery, archiving and access

Deliver a single document at a time, or use batch processing to send letters or forms to many recipients. Forms can be delivered via email or printed for postal delivery, and you can send them immediately or store them for future use as needed. If your basys system is integrated with an ECM system, you can archive all communications in your document repository, where they are automatically associated with the correct member, dependent or employer Correspondence record, so your member service team has all outgoing documents readily available for easy reference.

With **WriterXG** from basys, you can improve document accuracy, communicate with a clean, professional look and dramatically improve member service. Talk to your basys account exec today for additional details on **WriterXG**.

WriterXG Features	Value and Benefits
